The meeting will feature a variety of sessions, including invited addresses, symposia, and workshops. The invited addresses will be given by leading researchers in the field of psychometrics. The symposia will cover a wide range of topics, including new developments in item response theory, structural equation modeling, and measurement invariance. The workshops will provide hands-on training on a variety of psychometric methods.

In addition to the scientific program, the meeting will also include a number of social events. These events will provide opportunities for attendees to

network with each other and to learn more about the culture of Chile.
