In today's world, it is more important than ever to ensure that our buildings are performing at their best. Building performance analysis is a vital tool for understanding how buildings use energy, water, and other resources, and for identifying ways to improve their efficiency and sustainability.

In this comprehensive guide, Pieter De Wilde provides a step-by-step overview of building performance analysis, covering everything from data

collection and analysis to reporting and communication. He also discusses the latest trends and technologies in building performance analysis, and provides case studies of successful projects.

Whether you are a building owner, architect, engineer, or student, this book will provide you with the knowledge and tools you need to improve the performance of your buildings.

About the Author

Pieter De Wilde is a leading expert in building performance analysis. He has over 20 years of experience in the field, and has worked on a wide range of projects, from small residential buildings to large commercial complexes.

Pieter is a frequent speaker and writer on building performance analysis, and his work has been published in numerous journals and conferences. He is also a member of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE), and the International Building Performance Simulation Association (IBPSA).
