## Keynote Speakers

- **Professor Michael Gaitan**, Director of the Institute for Smart Innovation and Technology, University of South Carolina
- **Dr. Lisa Boone**, Head of Innovation and Technology, World Bank
- **Dr. Peter Bihl**, Director of the Smart Cities Research Centre, Coventry University

These distinguished speakers shared their perspectives on the key challenges and opportunities in the development and deployment of Smart Innovation Systems, emphasizing the need for collaboration between academia, industry, and government to accelerate progress.

## **Technical Sessions**

The symposium featured a wide range of technical sessions covering the latest research and applications in Smart Innovation Systems, including:

- Industry 4.0 and Smart Manufacturing
- Smart Cities and Urban Systems
- Intelligent Transportation Systems
- Healthcare Technologies and Medical Informatics
- Sustainable Energy and Environmental Technologies
- Emerging Technologies and Future Trends
- Innovation Management and Business Strategy
- Digital Transformation and Smart Society

Participants engaged in lively discussions on the challenges and opportunities associated with these emerging technologies, sharing best practices and exploring potential collaborations.

## **Proceedings**

The proceedings of the 3rd KES STS International Symposium are now available online, providing a valuable resource for researchers,

practitioners, and policymakers interested in the latest advancements in Smart Innovation Systems and Technologies. The proceedings include:

- Over 100 peer-reviewed papers
- Invited keynote speeches
- Panel discussions and workshops

The proceedings offer a comprehensive overview of the state-of-the-art in Smart Innovation Systems, serving as an essential reference for anyone working in this field.

## **Impact**

The 3rd KES STS International Symposium was a resounding success, fostering collaboration and knowledge sharing among attendees. The insights gained at the symposium are already having a tangible impact on the development and deployment of Smart Innovation Systems, contributing to:

- Increased productivity and competitiveness in businesses
- Improved quality of life in cities and communities
- Enhanced efficiency and accessibility in healthcare
- Acceleration of the transition to a sustainable and resilient future

The symposium has also inspired new research directions and collaborations, laying the foundation for continued advancements in the field of Smart Innovation Systems and Technologies.
