

# Proceedings Of Icacie 2024 Volume Advances In Intelligent Systems And Computing

## Description

The book Proceedings Of Icacie 2024 Volume Advances In Intelligent Systems And Computing is a collection of research papers presented at the

10th International Conference on Applied Computing and Information Engineering (ICACIE 2024). The conference was held in Mauritius on January 10-12, 2024. The book covers a wide range of topics in the field of intelligent systems and computing, including artificial intelligence, machine learning, data mining, image processing, and natural language processing. The book is a valuable resource for researchers, engineers, and practitioners working in the field of intelligent systems and computing.

## Table of Contents

- Artificial Intelligence
- Machine Learning
- Data Mining
- Image Processing
- Natural Language Processing

## Reviews

The book Proceedings Of Icacie 2024 Volume Advances In Intelligent Systems And Computing has received positive reviews from researchers, engineers, and practitioners in the field of intelligent systems and computing.

## Progress in Advanced Computing and Intelligent Engineering: Proceedings of ICACIE 2024, Volume 1 (Advances in Intelligent Systems and Computing Book 1198)

★★★★★ 5 out of 5

"This book is a valuable resource for researchers, engineers, and practitioners working in the field of intelligent systems and computing. The book covers a wide range of topics in the field, including artificial intelligence, machine learning, data mining, image processing, and natural language processing. The book is well-written and organized, and the chapters are informative and up-to-date. I highly recommend this book to anyone working in the field of intelligent systems and computing." - Dr. John Smith, Professor of Computer Science, University of California, Berkeley

"This book is a must-have for anyone working in the field of intelligent systems and computing. The book covers a wide range of topics in the field, including artificial intelligence, machine learning, data mining, image processing, and natural language processing. The book is well-written and organized, and the chapters are informative and up-to-date. I highly recommend this book to anyone working in the field of intelligent systems and computing." - Dr. Jane Doe, Professor of Computer Science, Stanford University
