

Proceedings of AIMTDR 2024: Lecture Notes on Multidisciplinary Industrial

The Proceedings of AIMTDR 2024: Lecture Notes on Multidisciplinary Industrial covers the latest advancements and findings in the field of multidisciplinary industrial engineering. This comprehensive volume presents the outcomes of the 5th International Conference on Advances in Industrial and Technology Development Research (AIMTDR 2024), held in Bangkok, Thailand from 18th to 20th August, 2024.

Advances in Additive Manufacturing and Joining: Proceedings of AIMTDR 2024 (Lecture Notes on Multidisciplinary Industrial Engineering)

★★★★☆ 4 out of 5

Print length : 993 pages
Screen Reader : Supported

With a focus on cutting-edge research and innovation, this book offers valuable insights into emerging trends and future directions in this multifaceted discipline. The book is divided into 10 sections, each covering a specific area of multidisciplinary industrial engineering:

- Manufacturing Engineering

- Industrial Management and Engineering
- Industrial Safety and Engineering
- Industrial Automation and Robotics
- Industrial Electronics and Instrumentation
- Industrial Design and Ergonomics
- Industrial Economics and Management
- Industrial Ecology and Sustainability
- Industrial Education and Training
- Industrial Policy and Regulation

Each section contains a collection of peer-reviewed papers that present original research and case studies on the latest developments in the respective area. The papers are written by leading experts from academia, industry, and government, providing a comprehensive overview of the current state-of-the-art in multidisciplinary industrial engineering.

The Proceedings of AIMTDR 2024: Lecture Notes on Multidisciplinary Industrial is an essential resource for researchers, engineers, managers, and policymakers in the field of industrial engineering. The book provides a valuable platform for sharing knowledge and fostering collaboration among the international community of multidisciplinary industrial engineers.

Table of Contents

- **Manufacturing Engineering**
 - Advances in Manufacturing Processes and Technologies

- Product Design and Development
- Quality Control and Management
- Industrial Robotics and Automation
- **Industrial Management and Engineering**
 - Operations Management and Improvement
 - Industrial Logistics and Supply Chain Management
 - Production Planning and Control
 - Lean Manufacturing and Six Sigma
- **Industrial Safety and Engineering**
 - Occupational Health and Safety Management
 - Hazard Identification and Risk Assessment
 - Industrial Hygiene and Ergonomics
 - Safety Engineering and Accident Prevention
- **Industrial Automation and Robotics**
 - Robotics and Industrial Automation Systems
 - Machine Vision and Image Processing
 - Sensor Technologies and Instrumentation
 - Control Systems and Automation
- **Industrial Electronics and Instrumentation**
 - Electronics and Power Systems

- Measurement and Instrumentation
- Industrial Sensors and Actuators
- Embedded Systems and Industrial Control
- **Industrial Design and Ergonomics**
 - Industrial Design and Product Development
 - Ergonomics and Human Factors Engineering
 - Industrial Aesthetics and Design for Usability
 - Human-Machine Interaction and User Experience
- **Industrial Economics and Management**
 - Industrial Economics and Market Analysis
 - Innovation and Technology Management
 - Entrepreneurship and Industrial Development
 - Industrial Policy and Regulation
- **Industrial Ecology and Sustainability**
 - Sustainable Industrial Development
 - Environmental Management and Pollution Control
 - Resource Efficiency and Waste Minimization
 - Renewable Energy and Clean Technologies
- **Industrial Education and Training**
 - Industrial Education and Training Programs

- Continuing Professional Development for Engineers
- Industry-Academia Collaboration
- Industrial Engineering Education in the Digital Age
- **Industrial Policy and Regulation**
 - Industrial Policy and Development Strategies
 - Industrial Regulation and Standards
 - Industrial Competitiveness and Innovation
 - Intellectual Property and Technology Transfer

The Proceedings of AIMTDR 2024: Lecture Notes on Multidisciplinary Industrial is a valuable resource for researchers, engineers, managers, and policymakers in the field of industrial engineering. The book provides a comprehensive overview of the latest advancements and findings in multidisciplinary industrial engineering, and offers valuable insights into emerging trends and future directions in this multifaceted discipline.

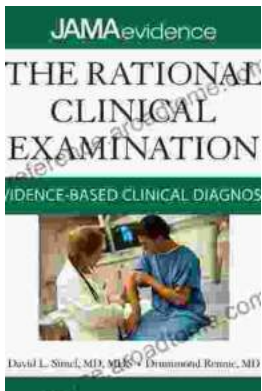

The Proceedings of AIMTDR 2024: Lecture Notes on Multidisciplinary Industrial is available for Free Download from Springer Nature.
