This comprehensive volume brings together the insights of leading experts from academia and industry, showcasing cutting-edge advancements in various areas, including:

- Audio Engineering and Signal Processing
- Music Information Retrieval and Analysis
- Virtual Reality and Audio
- Sound Synthesis and Modeling
- Music Cognition and Perception

Delve into a World of Sound Innovation

With its in-depth technical papers and thought-provoking presentations, the Proceedings serve as an invaluable resource for:

- Researchers pushing the boundaries of sound and music technology
- Developers creating the next generation of audio products and applications

- Educators shaping the future of sound education
- Professionals seeking to enhance their knowledge and skills in the field

Key Features of the Proceedings:

- Over 50 original research papers
- Expertly curated by renowned editors
- Peer-reviewed for quality and rigor
- Comprehensive coverage of emerging technologies
- International perspectives from leading researchers

Join the Global Sound and Music Revolution

The 8th Conference on Sound and Music Technology was a resounding success, bringing together over 200 attendees from 30 countries. The Proceedings capture the essence of this groundbreaking event, providing a lasting legacy of knowledge and inspiration.

By acquiring a copy of the Proceedings, you gain exclusive access to the latest advancements and insights in sound and music technology. It's your opportunity to:

- Stay at the forefront of technological breakthroughs
- Advance your research and development efforts
- Gain competitive insights for your projects
- Expand your professional network

- Contribute to the ongoing evolution of sound and music technology
