

Psychological Therapies In Acquired Brain Injury: Current Issues In

Psychological Therapies In Acquired Brain Injury: Current Issues In is a comprehensive and authoritative guide to the psychological therapies used in the rehabilitation of people with acquired brain injury (ABI). The book covers a wide range of topics, from the assessment and diagnosis of ABI to the specific therapies used to address the cognitive, emotional, and behavioral problems that can result from brain injury.

The book is divided into four parts. Part 1 provides an overview of ABI, including its causes, symptoms, and diagnosis. Part 2 discusses the assessment and diagnosis of the cognitive, emotional, and behavioral problems that can result from ABI. Part 3 reviews the specific therapies used to address these problems, including cognitive rehabilitation, behavioral therapy, and psychotherapy. Part 4 provides a discussion of the challenges and future directions in the field of ABI rehabilitation.
