### By [Author Name]

This book explores the intersection of theatre and cognitive neuroscience, examining how the two disciplines can inform and enhance each other. The book features contributions from leading scholars in both fields, and provides a comprehensive overview of the latest research on the cognitive processes involved in theatre performance.

The book is divided into four parts. The first part, "The Cognitive Neuroscience of Theatre," provides an overview of the cognitive processes involved in theatre performance, including perception, emotion, and cognition. The second part, "The Theatre of Cognitive Neuroscience," explores how cognitive neuroscience can be used to inform and enhance theatre practice. The third part, "The Science of Theatre," examines the scientific methods that can be used to study theatre performance. The

fourth part, "The Future of Theatre and Cognitive Neuroscience," discusses the future of the field and the potential for further collaboration between the two disciplines.

This book is an essential resource for anyone interested in the intersection of theatre and cognitive neuroscience. It provides a comprehensive overview of the latest research in the field, and offers insights into the ways that the two disciplines can inform and enhance each other.
