## Chapter 3: Similarity Assessment

Similarity assessment is a crucial component of CBR, as it determines how similar cases are retrieved from a case base. This chapter examines a wide range of similarity measures, from distance-based measures to knowledge-intensive measures. Readers will learn how to select and apply the most effective similarity measure for their specific application.

## Chapter 4: Case Adaptation

Once similar cases have been retrieved, they must be adapted to the current problem situation. This chapter explores the various techniques for case adaptation, including local adaptation, global adaptation, and transformational adaptation. Readers will learn how to select and apply the most appropriate adaptation technique for their specific application.
